UniPath provides the most comprehensive Women's Health Care molecular menu, keeping the majority of your patient testing in Colorado. UniPath can perform these tests from our scientifically developed UniSwab™ as well as from the liquid based platforms SurePath™ and ThinPrep®.

The following is a comprehensive list of molecular tests available from UniPath. If one molecular test is ordered upfront, add-on testing is available for 45 days on UniSwab™, ThinPrep® and SurePath™. If no molecular test is ordered up front, add-on testing is available for 28 days on UniSwab™ and ThinPrep®. HPV and CT/NG testing can be added on to ThinPrep® specimens prior to 28 days after collection.
